___ Please check if any of the above information has changed since previous year.

II. Mining and Reclamation

1. Was the mine active during the past year? Yes X No ___
2. If active, how much ore or mineral was mined? 66.4 million short tons
3. How much additional acreage was disturbed during the past year?
approximately 150 acres
4. Briefly describe any new or additional surface disturbances that occurred during the past year. This description should include the type of work performed, and volume of material moved.

The 150 acres disturbed in 1994 was the result of installing a series of cutoff walls across selected drainages on the east side waste rock dumps. It should be noted that this area was also reclaimed in 1994. Actual mining and waste rock disposal activities did not disturb any new acreage as these operations were conducted within the footprint of previous mining and dumping workings.

5. How much acreage was reclaimed during the past year? 1197 acres
6. Briefly describe the reclamation work performed during the past year. This description should include methods employed, and an evaluation of the results.

Mine	250 acres reclaimed and hydroseeded
	300 medium trees planted
	3 miles of drip irrigation installed

Mine Waste Disposal/ East Side Drainage	90 acres East Side Dump slope reduction
	390 acres of soils placed and contoured

	515 acres seeded 11,000 small, medium and large trees planted
Ore Processing Facilities	32 reclaimed and hydroseeded 11,000 sq. ft. of lawn planted and maintained (town of Copperton)
Tailings Disposal Area	400 acres hydroseeded 4000 tall trees planted 14 miles of drip irrigation installed 20 medium size trees planted/Riter Canal
Pump Station	
*Bingham Creek and *Motor Cycle Park	500 acres of soil placed and contoured 950 acres seeded
*Bingham Flats *South Jordan Evap. Ponds	250 acres seeded 800 acres seeded

* Notes areas reclaimed outside DOGM permit area.

Despite the extremely dry summer of 1994, most seeded areas established some vegetation. The on-going East Side Dump reclamation work continued with excellent visible results. Successful reclamation work also continued on the tailings impoundment. Some areas around the ore conveyor and transfer stations were reseeded in the fall of 1994 after spring seeding did not take.

7. What is the total disturbed acreage at years end? 10697.3 acres
8. Briefly summarize any mining and/or reclamation plans for the upcoming year.

The 1995 Reclamation Activities Plan is being prepared and will be submitted to the Division upon completion.

NOTE: Section III., "Additional Information" applies only to **large mining operations.**

III. Additional Information

1. An updated surface facilities map should be attached if there have been significant changes since the previous map was submitted.

2. Any monitoring results or other reports that are required under the terms of the approved notice of intention should also be submitted.

IV. Signature Requirement

I hereby certify that the foregoing is true and correct.
